BOARD.VISION

The digital board of the future that elevates your governance.

The board portal developed in collaboration with end users to champion effective governance and drive efficiency in compliance.

In this fast-paced world, the highest performing boards are those quick to respond with informed decisions based on time-sensitive information. This agility is the competitive edge your business needs to stay ahead.

Board.Vision is designed to help you achieve better governance by streamlining board processes. Directors and administrators can connect securely on a collaborative ecosystem, where they can access the latest information and confidential documents on the go, instantly simplifying the board's decision-making process. It also helps corporate secretaries manage the compliance of governance processes more efficiently.

Here's how business will thrive with Board.Vision.

It's quick and paperless.
More than ever, businesses need every advantage to beat the competition. This means making critical decisions efficiently. Going digital with Board.Vision allows boards to share, collaborate and decide on matters in record time. All this, with zero compromise on security.

Time is money, and we save lots of time.
Directors and administrators across different organisations can work together in one place. Streamlining the process means less time wasted on coordinating calendars, and more on reaching game-changing resolutions.

Always stay up to date.
Board.Vision houses all the latest information, with real-time notifications for ongoing changes. Directors can safely access and share sensitive board materials across devices, which means collaboration with fellow board directors can happen anytime, anywhere.

Meetings adjourn, collaborations do not.
Board.Vision is ideal for both two-way and multi-party collaboration. In a constantly shifting business landscape, a board's agenda may change in the blink of an eye. With Board.Vision, the board is kept in-sync and in-the-know on the big moves.

For Directors and Leaders.

Board.Vision is the difference between good and great governance. With just a click, directors can now manage and access multiple boards instantly and securely. With all board materials at their fingertips, collaborative decision-making is quicker than ever before.

Instant Overview.
Directors are enabled to make effective decisions for good governance with organised task lists and an overview of scheduled meetings and events.

Collaboration Made Easy.
Directors can collaborate seamlessly with secure messaging embedded in the system, and e-Signature to act on decisions in real-time.

Manage Multiple Boards in One Place.
Timely access to materials of different boards in one place enables informed decision-making anytime, anywhere.

Better Efficiency. Better Results.
Reducing all the manual hassle involved in coordinating a board's decision process means greater efficiency - saving time and lowering costs.

Secure Access, Home and Away.
Wherever they are, directors may access, review and annotate materials 24/7, with real-time notifications of updates. Confidential and sensitive information is secured with detailed access controls.

For Company Secretaries and Administrators.

A high-performing board is backed by seamless meeting preparations. Board.Vision reduces the hassle of coordination and ensures more efficient compliance, making the process more productive for all involved.

Intuitive Interface.
Our intuitive and user centric board portal keeps things simple, relieves arduous board preparation processes with automation, making it easier for administrators to track board activities for future planning and reporting.

Build and Share Board Packs.
Build, amend and share digital board packs instantly with real-time updates. Reduce risk of leaking confidential information with detailed access control over shared information.

Seamless Collaboration.
Board directors and administrators are connected on a highly secure platform for real-time collaboration from anywhere in the world. Get instant notifications of the board's progress, resolutions and voting outcomes.

Smart Scheduling.
Scheduling is hassle-free with Meeting Scheduler. Board directors can indicate their preferred meeting dates, with meetings planned and managed via notifications.

Protecting your corporate data is our first priority.

Protecting confidential information is absolutely vital. Board.Vision is designed to keep all board documents and corporate data safe and secure - at rest and in transit. From the user interface to the backend, data is protected at multiple levels, including application, infrastructure, and process. Each layer of security adheres to industry standards and best practices.

User Authentication.
Minimise the risk of unauthorised access with multi-factor authentication: password, biometrics (on supported devices) or PIN code.

Audit Trail Log.
All auditable actions are automatically documented from the meeting, pre-meeting, to post-meeting for good record-keeping.

Approvals with e-Signature.
All resolution approvals are made additionally secure with e-Signature.

Secure Communication.
Communications and documents are protected with AES-256-bit encryption during transit and at rest.

Set and Restrict Permissions.
Keep content secure by setting and restricting user access. Settings may be adjusted for individual documents for access by specific persons or committees.

Secure Database.
Designed for multi-tenancy with dedicated and encrypted database for each client.

Get started with all the training and support you need.

The team behind Board.Vision strives to deliver complete end-to-end service. Our technical capabilities and service-focused experts make us the partner of choice for corporate governance solutions.
